

Danté Kellman - Thompson

JUNIOR FRONTEND SOFTWARE ENGINEER

ABOUT

I have worked in comms and social media for 5 years, working at the National Audit Office and now for the Small Business Commissioner. I am now changing to be a frontend developer. I have proven in both of my roles over the past 5 years that I am willing to learn and apply that learning to workplace situations. I have been coding on in my spare time for 4 years now. Using Swift the most in particular but in the last 12 months I have started learning and practicing how to use HTML, CSS, Javascript and now I am learning how to use React. In this job role I would like to do what I have done throughout my career, and that is to apply my learning to a workplace situation, helping the organisation and be successful. See my website below.
